ATS Acoustic Panels with Guilford of Maine Fabric

Commercial-Grade Fabric and Class A Fire Rating.

ATS Acoustic Panels with Guilford of Maine fabric are our original ATS acoustic panels built with attractive, commercial-grade fabric from Guilford of Maine. This fabric has a high-end appearance and is inherently fire resistant. These panels are ASTM E84 Class A fire rated.

Customer Comments

"Infrablu Studio in Austin, TX outfitted with ATS panels exclusively. Thanks for the quick shipping."

- Marcelo , Texas

ATS Acoustic Panel - 24 x 24 x 2

Price and Order Item Description Q & A

Specs and Features

- This panel is 2 inches thick. [?]
- Average weight per panel: 6 lbs
- Core material is Roxul AFB mineral wool, a highly effective sound absorber (NRC 1.0 out of 1). Higher NRC means fewer panels are needed to treat your space.
- Built to last with a solid wood internal frame that protects edges and corners from dents and damage.
- 1/4-inch wood back panel for easy and secure installation without glue. Wall-mounting hardware and instructions included.
- Leaves no more wall damage than hanging a picture, ideal for temporary or rented space.
- Cover fabric is 100% polyester, Guilford of Maine, fire resistant. Fabric is NFPA 701 rated, and panel is ASTM E84 Class A fire rated, at no additional charge.
- Available in a range of colors to match your style.
- Combine sizes and colors in creative patterns for a unique and visually impressive look.
- Quick easy shipping via UPS Ground.
- Furniture-quality design and workmanship. Handcrafted in the USA.

Installation

Our professional installation kit is included at no extra charge. The kit includes aluminum clips, screws, and anchors for neat and secure installation on drywall, concrete, or wood walls. [Click here for full installation instructions. \(PDF\)](#)

**New!** For perfect positioning and easy installation, our no-measuring installation template is now included free with all installation kits (1 per order).

Absorption Coefficients

Customer Comments

“ Big delivery from ATS Acoustics today! Can't want to unwrap it!”

- Kiwanda Sound Recordings, Oregon

Desired edge profile \*

Panels with beveled edges have a 1/2-inch 45-degree eased edge around the entire rim of the panel. Panels with square edges have no bevel, like typical boxed art.

Beveled

Square

Customer Comments

“ These are pictures of my home theater room. I used five 24" x 36" ATS Acoustic panels- three on the back wall and two on the side wall. Thanks!”

- Gary, TX
